

💱 RateTrack

A clean, modern currency converter with live exchange rates and historical rate charts — built with vanilla HTML, CSS & JavaScript.

✨ Features

- 🌐 **150+ currencies** with flag emojis
 - ⚡ **Live exchange rates** via multiple API fallbacks (never fails)
 - 📊 **Rate history chart** — 7D, 30D, 90D trends for any currency pair
 - 🔄 **Swap button** — flip currencies instantly
 - 💡 **Quick amount chips** — 100, 500, 1K, 5K, 10K shortcuts
 - 📱 **Mobile-first** responsive design
 - 🚀 **Zero dependencies** — pure HTML/CSS/JS, single file
-

🖥️ Live Demo

[Add your Vercel URL here after deploying]

📁 Project Structure

```
ratetrack/  
├── index.html   ← The entire app (single file)  
└── README.md   ← You're reading this
```

🚀 Deploy to Vercel (Recommended)

Step 1 — Push to GitHub

1. Go to github.com and sign in
2. Click the "+" icon → **New repository**
3. Name it `ratetrack` (or anything you like)
4. Set it to **Public**
5. Click **Create repository**
6. On the next screen, click **"uploading an existing file"**
7. Drag and drop `index.html` and `README.md` into the upload area
8. Click **Commit changes**

Step 2 — Deploy on Vercel

1. Go to vercel.com and sign in with GitHub
2. Click **"Add New Project"**
3. Find and select your `ratetrack` repo
4. Leave all settings as default — Vercel auto-detects static sites
5. Click **"Deploy"**
6.  Done! Vercel gives you a live URL like `ratetrack.vercel.app`

Step 3 — Update README

Paste your live Vercel URL into the **Live Demo** section above.

Install as a Mobile App (PWA-style)

Since RateTrack is a web app, users can add it to their phone's home screen — it works like a native app.

On iPhone (Safari)

1. Open the RateTrack URL in **Safari**
2. Tap the **Share** button (box with arrow pointing up)
3. Scroll down and tap **"Add to Home Screen"**
4. Tap **"Add"** — RateTrack now appears on your home screen like an app

On Android (Chrome)

1. Open the RateTrack URL in **Chrome**
2. Tap the **three dots (:)** menu in the top right
3. Tap **"Add to Home screen"**
4. Tap **"Add"** — done!

On Desktop (Chrome / Edge)

1. Open the RateTrack URL
2. Look for the **install icon (⊕)** in the address bar on the right
3. Click it and select **"Install"**
4. RateTrack opens as a standalone desktop app

APIs Used

API	Purpose	Currencies
fawazahmed0 Exchange API	Live rates + History	150+
Frankfurter	Live rates fallback	30+ major
Open ER API	Live rates fallback	160+

All APIs are **free** with **no API key required**.

Run Locally

No build tools needed. Just open the file:

```
# Option 1 — just open in browser
open index.html

# Option 2 — serve with VS Code Live Server extension
# Right-click index.html → "Open with Live Server"

# Option 3 — serve with Python
```

```
python3 -m http.server 3000
# Then open http://localhost:3000
```

Tech Stack

- **HTML5** — structure
 - **CSS3** — styling (custom properties, flexbox, canvas)
 - **Vanilla JavaScript** — logic, API calls, chart rendering
 - **Google Fonts** — Sora + DM Sans
 - **Canvas API** — rate history chart (no chart libraries)
